SUMMARY

I'm an AI and Software Engineer, specializing in AI and ML. I'm interested in building practical products using AI and modern web technologies, with hands-on experience in Generative AI, RAG, machine learning, and full-stack development using Python, React, Next.js, and Node.js. I enjoy solving real-world problems through technology and working with teams and clients to turn ideas into working products.

EDUCATION

Malla Reddy College of Engineering and Technology, Hyderabad

2022 - 2026

Bachelor of Technology in Computer Science Engineering - AIML

CGPA: 8.45

Narayan Jr. College, Vijayawada

2020 - 2022

Intermediate

Percentage: 63.8%

Dr. K K R Gowtham International School, Vijayawada

2019 - 2020

SSC

Percentage : 87.6%

SKILLS

Languages: Python, SQL, JavaScript, TypeScript, HTML/CSS

Frameworks & Libraries: Node.js, React.js, Next.js, Bootstrap

Tools & Technologies: Git/GitHub, VS Code, make.com, Antigravity

Concepts: Gen AI, Agentic AI, RAG, ML, System Design, Agile, Prompt Engineering.

WORK EXPERIENCE

Knowvation Learnings | Design Engineer Intern

May 2026 - Present

- Building the company website and SaaS product interfaces using React, TypeScript, and Next.js, implementing responsive UI/UX from design concepts into functional web experiences.
- Designing UI/UX for a major game project, creating interactive interfaces and user flows while collaborating with the team on product and visual design.

Arrivio Home | Freelance Full Stack Developer

Jan 2026 - Present

- Built the full-stack foundation of a scalable B2B2C housing platform, developing the Node.js/Express backend and 100+ REST API endpoints, database schema, and 4 React/Next.js frontends deployed on Railway and Vercel with CI/CD.
- Engineered booking and B2B employer flows, building backend logic and API integrations for Stripe, DocuSign, and Supabase, while leading a team of 6 and collaborating with clients to demo solutions.

Edunet Foundation Microsoft | Software Intern [Certificate](#)

Apr 2025 - May 2025

- Developed a deep learning-based live conversion pipeline to generate images from speech by integrating real-time audio capture, transcription, and text-to-image synthesis, implementing models like fine-tuned Whisper-Base and Stable Diffusion v1.5 with Hugging Face pipelines and sentiment-based safety gating for controlled image generation.

Infosys SpringBoard | Student Intern [Certificate](#)

Oct 2024 - Dec 2024

- Developed a machine learning-based predictive model to assess pregnancy risks by analyzing key factors such as age, blood pressure, and blood sugar levels.
- Implemented Random Forest, Gradient Boosting, and SVM with hyperparameter tuning, improving prediction accuracy to 85%.

PROJECTS

Multi-Source Intelligent RAG System | *Python, LangChain, Ollama, Streamlit*

- Built a privacy-preserving RAG pipeline that ingests PDFs, web URLs, YouTube transcripts, and plain text using HuggingFace embeddings, ChromaDB for semantic vector retrieval, and LangChain to orchestrate the end-to-end flow.
- Deployed LLaMA 3 locally via Ollama for fully offline inference with zero external API dependency, delivering source-cited responses through an interactive Streamlit interface.

Vakya Vani – ISL Text & Speech Translator | *Computer Vision & Deep Learning*

- Developed a real-time sign language recognition pipeline using OpenCV, MediaPipe, CNNs, and LSTMs to translate Indian Sign Language into text and speech.

CERTIFICATIONS

- Software Engineering and Agile Software Development
- 24 Hour UI/UX Design Hackathon: Figma Design Recreation
- C1 Cambridge English Literature
- CCNA: Introduction to Networks

ACHIEVEMENTS

College Fest Website

Designed and developed an interactive **React.js-based website** for the college fest, enabling **500+ students** to register for events online and access **real-time updates**, improving event coordination efficiency by **40%**.

College Fest Poster Designs

Created and designed **15+ event posters** and promotional materials, leading to a **30% increase in student engagement** and a higher turnout across multiple fest events.
